Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1, 3-7 and 9-12 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a video reproduction method and apparatus for reproducing video data based on video bitstream comprising a video signal addition section for, while a still picture is being reproduced, adding a video signal generated by a video decoder and a first bit rate video signal generated by a video signal generation section so that the still picture, an identification of the picture type of the still picture, and a value corresponding to the number of bits of the still picture are displayed simultaneously, and while the moving picture is being reproduced, adding the video signal generated by the video decoder and a second bit rate video signal generated by the video signal generation section so that the moving picture and the average bit rate are displayed simultaneously.

The closest prior art van den Braden et al. (US Patent no. 6,011,868) teaches a similar video reproduction method and apparatus, however, van den Braden fails to particularly teach or suggest “*while a still picture is being reproduced, adding a video signal generated by a video decoder and a first bit rate video signal generated by a video signal generation section so that the still picture, an identification of the picture type of the still picture, and a value corresponding to the number of bits of the still picture are displayed simultaneously, and while the moving picture is being reproduced, adding the video signal generated by the video decoder and a second bit rate video signal generated by the video signal generation section so that the moving picture and the average bit rate are displayed simultaneously.*” as specified in the claims.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
